

## Committee Reorganization for Long Term Support

With Commissioning complete, the USS Colorado Commissioning Committee is about to restructure to organize around the mission of long-term support of the crew and their families for the 30 year plus life of the boat. This will require revised organization, bylaws, and a new 501C3, essentially creating a new organization. We are reaching out to find people to help with this reorganization and assume leadership roles in the new committee. We are also interested in finding out who might be interested in supporting this long-term mission. For this purpose, we have created an online survey to gather this information.

In addition to drafting bylaws, creating a 501C3 and determining leadership, the reorganization committee will develop policies for committee meetings, proposed activities and financing including a possible dues structure.

If you know of others who are not on this distribution but might be interested in joining this effort, please forward this email to them. We are reaching out to several military associated organizations within the state, so we apologize if you receive this request more than once.

Please take the survey here: [Google Form Survey](#)
